

IRinGIFT

Green innovations in students' final theses and semestral projects

A special workshop of the **49th SSCHE** conference

The conference is organized by the Slovak Society of Chemical Engineering between **May 15 - 18, 2023**. The aim of the 49th Conference is the presentation of research results and engineering solutions in the area of chemical and biochemical engineering, and process control with the focus on rational use of energy, ecology, and risk management. Registration for the conference is available online at <https://sscheconference.sk>.

Upon contribution registration please select **WAS&BIO and IRinGIFT** session.

Scope of the IRinGIFT workshop

- Biomass and waste as sources of renewable energy and materials
- Thermochemical processes and technologies for waste and biomass conversion
- Biofuels, bioenergy, biorefineries
- Anaerobic digestion of waste and biomass
- Renewable energy sources in industrial applications
- Green and sustainable environmental solutions

Conference venue

The conference will take place in Hotel Hutník situated in Tatranské Matliare in High Tatras. Accommodation will be provided in the conference hotel.
